

The University of Minnesota Extension Master Gardener program has conducted seed trials since the 1980s. The purpose of these trials is to compare several varieties of a single species of vegetable, flower, or herb to see which performs better in Minnesota gardens. Careful data is collected during the season, and the results of these blind tests are tabulated from observers throughout the state in October. Results are published on the Extension website early the next year. To view all past trial results visit:

https://sites.google.com/umn.edu/mnmastergardenerseedtrial/seed-trial-results

This garden highlights four of the trials, including 6 varieties each of parsnips, red beets and mini bok choy, all directly sown in the garden. It also trials 4 varieties of orange cauliflower which were started indoors and transplanted. In addition, the central trellis includes 5 unusual vines. The winged bean (*Physocarpus tetragonobolus*) produces simply gorgeous sky-blue flowers followed by edible bean-like fruit. The Indian Snake cucumber yields fruit up to three feet long. Dioscorea is known as cinnamon vine and is a true yam. Considered invasive further south, it struggles to overwinter here and is late to emerge in the garden, though it is a perennial. It shares a support with Okinawan Pure White bitter melon. A staple in asian cooking, the bitter melons require skill in cooking, but the white fruit and blood red seeds that drip from the ripe fruit at seasons end are worth growing as an ornamental. Finally, we have a a cucamelon vine (*Melothris scrabra*). Also known as Mexican sour gherkin, the fruit look like tiny watermelon, but has a lovely fresh cucumber taste eaten raw. The fruits may also be pickled just like other cucumbers.

Look for the other four trials in Annual Garden A, and watch with us during the year as the seeds grow, bloom, and produce.

	Vegetable	Herb
Asia	basella (India)	basil (India, SE Asia)
	bean soy (East Asia)	chives (Asia & Europe)
	bean yardlong V (S. Asia)	cumin - India and mediterranean
	cabbage chinese (China)	garlic (Iran)
	carrot (Afganistan)	horseradish (Russia, Ukraine)
	cucumbers (India)	lavender (India, middle east, mediterranean)
	eggplant (China)	lemongrass (SE Asia)
	mizuna (China)	marjoram (Turkey)
	mustard greens (India)	saffron (Iran) also Greece
	onion (SW Asia)	sorrel (Asia & Europe)
	pac choi (bok choy) (China)	tarragon (Siberia)
	pea (snow) (SW Asia)	
	pea (Turkey, Iraq)	
	radish (China)	
	shallots - Middle East (Palestine)	
	spinach (Iran)	
	turnip (E. Asia)	
Africa	cantaloupe (also S. Asia, India)	dill (Egypt)
	dioscorea batatas (West Africa)	
	lettuce (Egypt)	
	okra (Ethiopia)	
	sorghum	
	watermelon	
Europe	artichoke - mediterannean	
	asparagus pea - mediterannean	bay leaves - mediterranean
	beet/swiss chard (Italy/Sicily)	borage - easter mediterranean
	broccoli - mediterannean	caraway - mediterranean
	brussels sprouts- mediterannean	chives - Europe & Asia
	cabbage	cilantro - mediterranean
	cauliflower - mediterannean	cumin - mediterranean & India
	celery - mediterannean	fennel - mediteranean
	fennel - mediterannean	oregano - mediterranean
	kale - mediterannean	parsley - eastern mediterranean
	kohlrabi (northern Europe)	rosemary - mediterranean, Portugal, Spain
	leek - mediterranean	saffron - Greece & Iran
	lettuce - temperate Asia also	sage - mediterranean
	mustard - temperate regions	sorrel - Europe & Asia
	parsnip (Eurasia)	thyme - mediterranean
	rutabaga (Russia or Scandinavia)	

native countries

C. America	green bean (also SA) peppers, sweet (also SA) pumpkin (also Mexico) runner bean (mountains) sweet potatoes (also SA) tomatillo (also Mexuco)	paprika (also Mexico & S America)
N. America	chili peppers (Mexico)	paprika (Mexico, C and S America)
	corn (Mexico) squash (Mexico & C. America) sunflower	wintergreen
	zucchini (Mexico)	
S. America	peanut (Brazil, Peru) potato (Peru-Bolivian Andes) tomato (Andes)	lemon verbena (Argentina, Chile) paprika (also Mexico & C America) stevia - Paraguay
0		vanilla (humid rainforest of Columbia, Brazil)
Oceania		
Global		mint - temperate areas of the world
